

## [1]

Renesas Electronics Europe GmbH, headquartered in Duesseldorf, Germany, is a leading developer and supplier of semiconductor products in Europe. Committed to meeting customers' cost, performance and time-to-market requirements, the company offers solutions ranging from standard products to system-on-a-chip (SoC) solutions, as well as customized products for next-generation designs. Our customers also benefit from state-of-the-art manufacturing from the global production network of our parent company, Renesas Electronics Corporation.

Having the goal within the Automotive Business Unit to fulfill the standard Automotive SPICE (ISO15504) capability level 2 for the HIS scope, Method Park with their highly motivated and experienced workforce, supported us to optimize the current development process of our Flash Library Centre operation.

With the excellent support of Method Park's consultants we were able to define a smart development process, with future possibility to enhance to capability level 3, accepted by all members of the team. Beside that, the defined process is ready to be spread across other teams within the organization in comparable short time.
