

# Stages Solutions

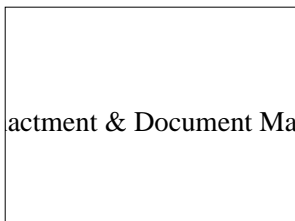

## Process Management [1]

Build your own advanced process asset library that fits your organization and implement the processes in projects. Dynamic visualization of processes eliminates the need to maintain process graphics.

[2]

## Details [3]

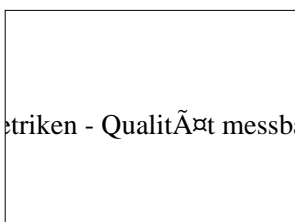

## Enactment [4]

### Document Management

Implement development processes in Stages as workflows for documents and connect process theory with practical reality. The result; access to up-to-date work results and the current status enabling management of process enactment.

[5]

## Details [6]

## Metrics [7]

### Quality Made Measurable

Real-time reporting makes all important performance figures, metrics and multiple types of analysis available to the project members. The cockpit for your projects and processes.

[8]

▣ **Details [9]**

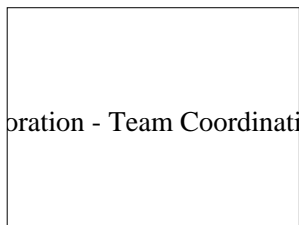

[10] **Compliance Management [11]**

### **Organization-Wide Process Conformance**

Handling standards can be complicated; not with Stages simply link your processes to maturity models, industry or company standards. The result; demonstrate compliance, run gap analysis reports and know where you can tailor project processes.

▣ **Details [12]**

[13] **Collaboration [14]**

### **Team Coordination In Practice**

Information and knowledge management brought together in your Stages platform makes the practical implementation of your processes not only possible but seamless.

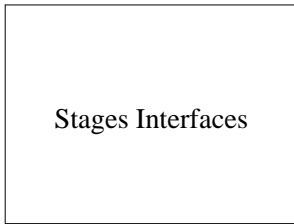

[15]

▣ **Details [16]**

**User Acceptance [17]**

No need to scrap your tool landscape or change the way your processes are structured, Stages is structured to suit you! The result; increased user acceptance and therefore greater control of the process.

## Seamless Integration

### Interfaces To Other Tools

- SAP NetWeaver Portal,
  - MS Project, MS Office,
  - ARIS Toolset,
  - IBM Rational ClearCase,
  - Telelogic CM Synergy,
  - MKS Source Integrity,
  - MKS Integrity Manager,
  - Serena Professional (PVCS Version Manager),
- 
- Subversion,
  - CVS,
  - LDAP,
  - SPNEGO,
  - IMAP4,
  - POP3,
  - etc.
