

Press Release

Method Park courses now available as live online training

On-site courses paused for the time being

The Erlangen-based software and systems company responds to the current situation and now offers its courses as remote training.

Erlangen, March 25, 2020 - As a training provider, Method Park takes its responsibility in the present situation seriously and wants to help stop the coronavirus from spreading. With a wide range of live online training, course participants can still join their further training. They can also take their exams and certifications online.

On-site courses replaced by remote training

Method Park offers a broad course program on the challenges of Software & Systems Engineering. So far, Method Park performed its public and in-house training courses in face-to-face sessions. These sessions are paused for the time being and conducted remotely instead.

A balance between safety and know-how transfer

Method Park COO Dr. Martin Geier explains: "Online training courses are innovations for lifelong learning and present a genuine opportunity for both our participants and for us as a training provider." With the remote courses, Method Park successfully achieves the currently required balance between the safety of participants on the one hand and knowledge transfer for them on the other.

Necessary adjustments

This new form of implementation requires a few adjustments. Method Park reduced the maximum group size from twelve to eight participants and shortened the individual training days. The training content will be redistributed to additional days, and participants will receive extra tasks to deepen the contents.

Further information

Method Park provides information about the new online offering on its website. Interested participants can also contact the Training Center directly (phone: +49 9131 97206-556, email: trainingcenter@methodpark.de).

About Method Park

Method Park specializes in complex product engineering in the environments of the automotive, medical, and aerospace industries. Method Park's portfolio includes consulting and engineering services, a comprehensive training program, and the process management tool "Stages".

Method Park was founded in 2001. On a worldwide basis, the company has supported and coached its customers on process optimization, compliance to industry-specific standards, and legal regulations, as well as the management of projects, products, and quality assurance. Method Park offers a practice-based training program on all current topics of Software & Systems Engineering. In 2017, Method Park became an official VDA QMC training provider of Automotive SPICE® courses. For the recent version of Automotive SPICE® V3.1, Method Park has developed a free app for iOS and Android.

With "Stages", Method Park offers a model-based process management tool, which supports its users on the definition, communication, and application of complex processes, particularly in the engineering environment – globally, beyond organizational borders and always in compliance with various industry-specific standards.

With around 200 employees, the company group has locations in Erlangen, Frankfurt on the Main, Hamburg, Munich and Stuttgart as well as in Detroit, Miami and Pittsburgh in the US and Shanghai in China. In 2019, Method Park generated an operative turnover of about 21 million euros.
