

ParkCheck for Agile Product Development

Agile Product Development from Method Park by UL Solutions can help you to increase predictable and regular delivery of business value and engages your employees' active participation.

Parkcheck for Agile Product Development provides you with an external perspective on your agile processes, artifacts and practices. It will help you reflect on your current status quo and develop specific improvement ideas.

Through both guided self-reflective workshops and “take-a-look” sessions, you and our agile experts will look together at the following aspects:

Common understanding of agility – Why should you care about agility as a business practice? What challenges do you want to overcome with agile principles and practices?

Team agility – How do your teams live agile values and principles?

Technical agility – How do your engineering practices support agile product development and delivery?

Agile product development process – How do agile principles and practices guide your process of product definition, planning and delivery? And in case of critical systems, how do they support your quality system?

Collaboration architecture – How do you facilitate collaboration across multiple teams to build a product together?

Value proposition

- Identify gaps with a neutral, experienced partner.
- Use reflection results and observations to plan the next improvement steps.
- Learn how Method Park by UL Solutions can support you with further services.

Choose ParkCheck Agile Product Development if:

- You want to have a guided and experienced alternative perspective on your agile development processes.
- You feel specific pain points in your agile product delivery (for example, decreasing time to market, understanding customer needs, or mitigating risks of late integration).
- You plan an agile transformation or changes in your organization and want to reflect the status quo and collect improvement ideas.
- You are in need of scaling your product development.

Specific takeaways

- Receive specific feedback on your agile processes, artifacts and practices
- Generate new insights through guided self-reflection
- Create an improvement backlog

How does it work?

- In a short get to know each other session, you decide on which of the five ParkCheck aspects you would like to employ: Common understanding of agility, team agility, technical agility, agile product management and collaboration architecture.
- Our experienced coaches will organize workshop sessions for you.

Target audience

- Engineering managers/team leads
- Chief technology officers
- Systems engineers
- Quality/R&D leads
- Hardware/software developers
- Product owners/developers/leads
- Testing engineers
- Data scientists
- Scrum masters
- Architects

Why choose Method Park by UL Solutions?

Method Park by UL Solutions specializes in software and systems engineering for complex, innovative products. Our portfolio includes process-based product engineering, high-quality software development, training and consulting services focused on the safety-critical aspects of automotive, medical and other regulated industries. All ParkChecks are executed by active practitioners who have extensive and up-to-date experience from day-to-day business as well as long-time training and coaching skills.

Disclaimer: Within the UL family of companies, we provide a broad portfolio of offerings for the automotive industry. This includes testing, inspection, assessment, certification and consulting services. In order to protect and prevent any conflict of interest, perception of conflict of interest and protection of both our brand and our customers' brands, UL Solutions has processes in place to identify and manage any potential conflicts of interest and maintain impartiality.
